

estadísticas laneras argentinas • argentine wool statistics

Viernes 16 de julio del 2021

EL 752 (06/2021)

Existencias y consumo (sucio) / Stocks and consumption (greasy)

| | | | |
|-----------------------|------------------|-----------------------|-------------|
| Producción (estimado) | 40.670 toneladas | Production (estimate) | 40,670 tons |
| Consumo local | 4.611 toneladas | Domestic consumption | 4,611 tons |
| Remanente (sucio) | 43.072 toneladas | Carryover (greasy) | 43,072 tons |

Exportaciones / Exports

| | | | |
|--------|---------------------|--------|----------------|
| Sucio | 30.257,00 toneladas | Greasy | 30,257.00 tons |
| Limpia | 17.777,00 toneladas | Clean | 17,777.00 tons |

| | | | |
|----------------------------------|---------|-----------------------------|---------|
| Lana sucia | 33,23 % | Greasy wool | 33,23 % |
| Lana lavada | 2,38 % | Scoured wool | 2,38 % |
| Peinada, blousses y subproductos | 64,39 % | Tops, noils and by-products | 64,39 % |

| | | | |
|--------------------|------------------|-----------------|------------------|
| Ingreso de divisas | 135.348.610 U\$S | Currency income | 135,348,610 U\$S |
|--------------------|------------------|-----------------|------------------|

Nota metodológica / Methodological note

Las cifras de este reporte están expresadas en toneladas, ya sea base limpia o base sucia. La diferencia entre ellas obedece a que el peso de la lana puede ser considerado sucio o limpio. Así, en el supuesto de una lana que se exporte sucia, el peso efectivo –lo que efectivamente pesa el embarque en balanza– coincidirá con el peso base sucia. No obstante, si se aplica el rinde declarado para ese lote –esto es: lo que rendirá esa lana sucia una vez sometida a procesos industriales de lavado y peinado– se obtendrá su peso base limpia. Esto no ocurre con las lanas lavadas, peinadas, blousses o subproductos. En estos casos el peso efectivo coincidirá con el peso base limpia. Las comparaciones entre los distintos niveles de industrialización deberán hacerse siempre sobre el peso en base limpia.

- Obtención base limpia: La lana sucia se convierte a base limpia aplicando los rindes específicos de cada embarque y sólo supletoriamente los rindes promedio que figuran en la tabla a pie de página.
- Obtención base sucia: La lana lavada, peinada, blousses o subproducto se convierte a base sucia aplicando los coeficientes de conversión de la tabla siguiente:

Figures contained in this report are all in tons, either clean or greasy basis. The difference between both lies in a peculiarity of the wool market: weight of wool can be considered greasy or clean. This is, in the case of greasy wool exports, the actual weight of the load will be equal to the greasy basis weight. However, would the yield rate declared for that shipment be applied to the actual weight, the result is the clean basis weight of that load (the yield rate stands for the amount of wool obtained after processing the greasy wool).

This does not occur with scoured wool, tops, noils or byproducts. In those cases the actual weight equals clean basis weight. Any comparison between the different kinds of wool (greasy, scoured, tops, noils, by-products) must always be made on clean basis weight.

- Clean basis calculation: conversion of greasy wool weight into clean basis is done applying the specific yield rate declared for each shipment. Should particular yield rates not be available, average rates (detailed below) will apply.
- Greasy basis calculation: The weight of the scoured wool, tops, noils and by-products is converted to greasy basis applying the greasy basis conversion rates that follow:

Equivalencias de finura en micrones y coeficientes de conversión / Fineness equivalents in microns and conversion factors

| Fina | Fine | Desde / From | | Hasta / To | | A limpia | To clean | A sucia | To greasy |
|---------|--------|--------------|-------|------------|----------|----------|----------|---------|-----------|
| | | más fina | finer | 24,5 | 24,5 | | | | |
| Mediana | Medium | 24,6 | 24,6 | 32,5 | 32,5 | 62,00% | 62,00% | 161,29% | 161,29% |
| Gruesa | Coarse | 32,6 | 32,6 | + gruesa | stronger | 66,00% | 66,00% | 151,51% | 151,51% |
